

Press Release

Montebelluna, 19 January 2017

## PRESS RELEASE

---

Veneto Banca communicates that the European Commission has evaluated, in line with European regulations on state aid, the request presented by the bank to receive liquidity support and therefore to obtain the possibility of issuing further State-guaranteed Bonds in accordance with Italian Legislative Decree 237 of 23 December 2016.

This positive evaluation means that the support requested is to be considered finalised, appropriate in its proportions, and limited in time and in its objectives. The Ministry of Economy and Finance may therefore issue the state guarantee on new bonds issued by the Bank allowing it to make use of further means of intervention to ensure effective management of the treasury and to stabilise medium-long term management of the liquidity position.
